

Apache
Airflow

whoami

- Joshua
- Student @ WMU
- Systems Analyst / Developer @ a college
- If u want to know more, have a qr code

air who?

- Maintained by Open Source Contributors and the Apache Software Foundation
- For my big data friends you may recognize apache Hadoop, Cassandra and CouchDB.
- The honorable, but not database software, Gaucamole RMS

cassandra

air what?

The screenshot shows the Apache Airflow web interface at `http://localhost:8080/dags`. The interface includes a sidebar with navigation links: Home, Dags (selected), Assets, Browse, Admin, Security, Docs, and User. The main content area displays a list of 6 DAGs under the 'Dags' tab. The table columns are: Dag ID, Schedule, Next Run, Latest Run, Tags, and actions (play, star, trash). The DAGs listed are:

Dag ID	Schedule	Next Run	Latest Run	Tags
<input type="checkbox"/> job.always_fail	0 * * * *	2025-11-18 16:00:00	2025-11-18 15:00:00 ✖	test, email
<input type="checkbox"/> job.always_pass	0 * * * *	2025-11-18 16:00:00	2025-11-18 15:00:00 ✔	email, test
<input type="checkbox"/> job.daily_test_email	0 0 * * *	2025-11-18 19:00:00	2025-11-18 13:48:38 ✔	email, test
<input type="checkbox"/> job.daily_weather_report	0 5 * * *	2025-11-19 00:00:00	2025-11-18 14:16:11 ✔	email, test
<input type="checkbox"/> job.maybe_fail_maybe_pass	0 * * * *	2025-11-18 16:00:00	2025-11-18 15:00:00 ✔	email, test
<input type="checkbox"/> job.test_conns	0 0 * * *	2025-11-18 19:00:00	2025-11-18 13:30:21 ✔	email, test

air why?

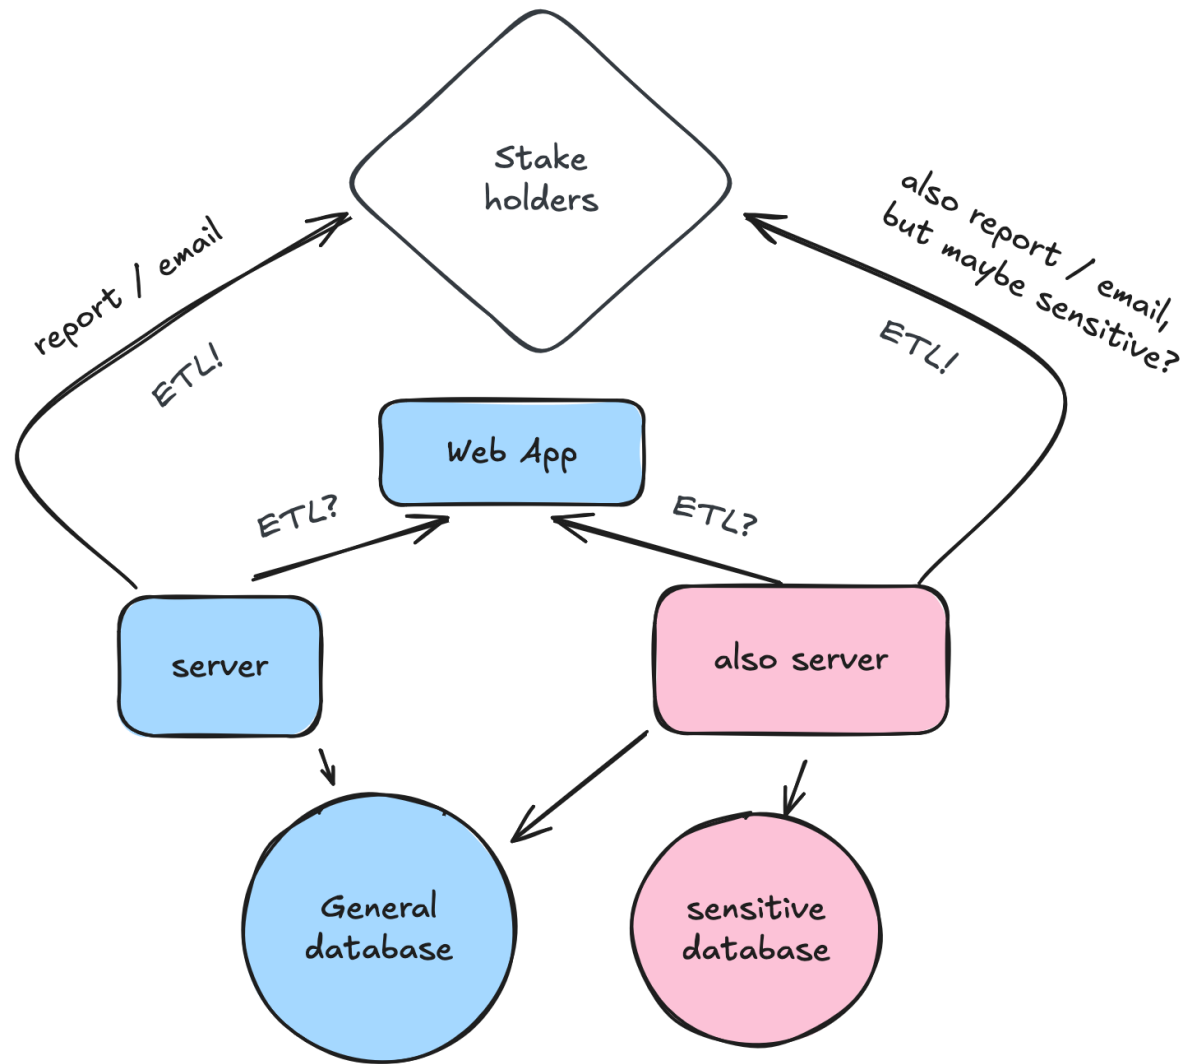

a world without airflow

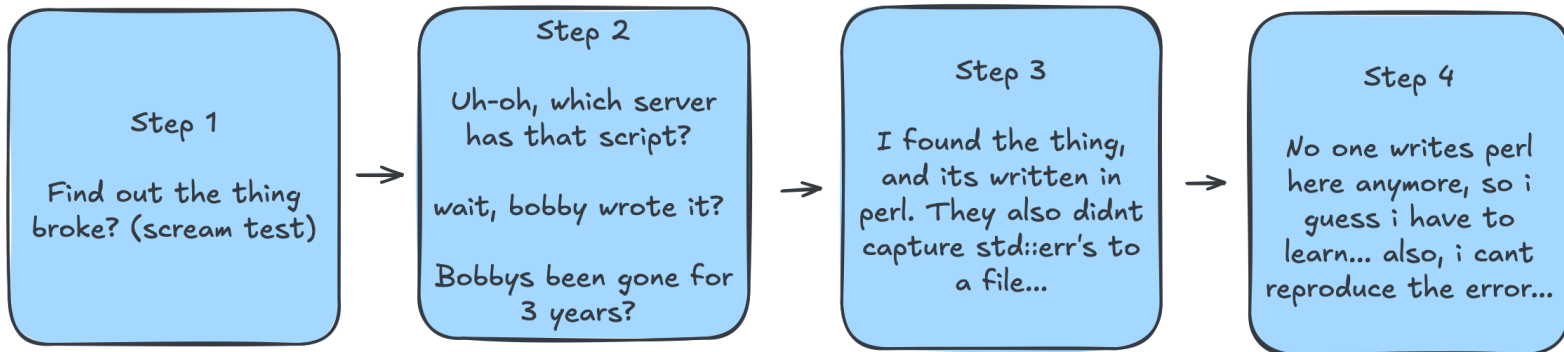

air why?

Two servers is pretty simple, but what are some reasons you may add a server into this mix? (hint: something to do with the programming language you use)

how many linux servers can you guess a medium to large size company has? (for all of my services, I have roughly 8... these are all just for me!!)

air why?

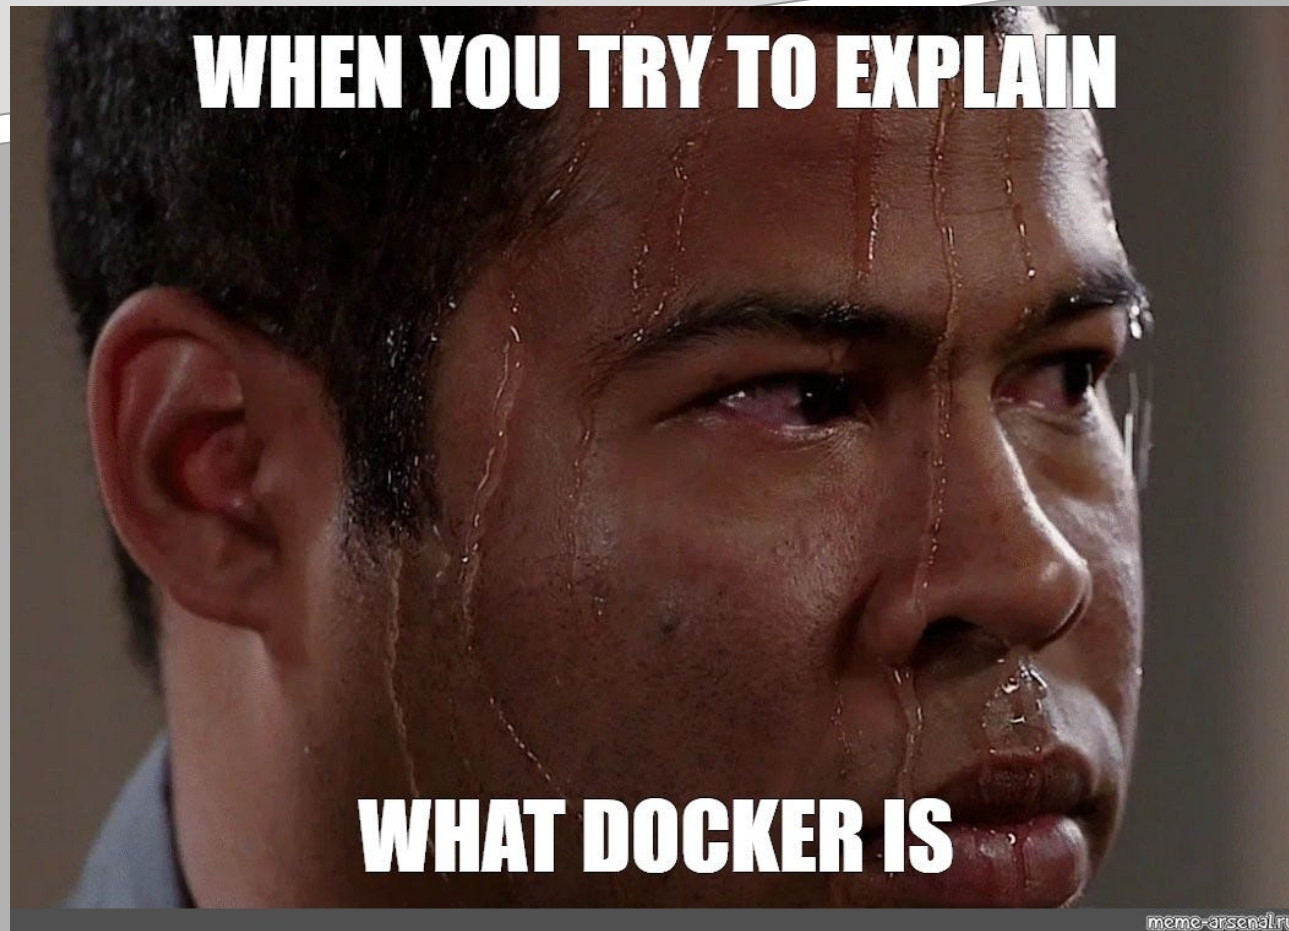

```
worker1: ~ cronitor list
> Reading user "ubuntu" crontab
+-----+-----+
| SCHEDULE | COMMAND |
+-----+-----+
| 0 1 * * * | /var/app/edi/send_batch_invoices.py |
| 0 2 * * * | /var/app/edi/send_batch_settlement.py |
| */20 * * * * | /var/app/edi/reconciler.sh --full |
| * * * * * | /var/app/reporting/rollup minute |
| 0 * * * * | /var/app/reporting/rollup hour |
| 0 0 * * * | /var/app/reporting/rollup day |
| 5 0 * * * | /var/app/reporting/rollup archive-ancient-data |
+-----+-----+
> Reading /etc/crontab
+-----+-----+
| SCHEDULE | COMMAND |
+-----+-----+
| 0 * * * * | /tmp/foo.sh --systemcrontab |
+-----+-----+
worker1: ~ █
```

air how

air how

**If I havent actually shown you the
configuration and dashboard by now, I
should do that now... :)**

to me, [redacted]@unorthodoxdev.net

2:16 PM (1 hour ago)

Good Morning!

Today's weather report is as follows:

Temperature: 36 F

Short Forecast: Chance Rain Showers

Detailed Forecast: A chance of rain showers. Cloudy, with a high near 36. East wind around 8 mph. Chance of precipitation is 50%.
New rainfall amounts less than a tenth of an inch possible.

Have a great day!
